# Patience ("Solitaire")

*An interesting and challenging one-person game for all ages!*

**Object:** to move the light colored marbles in place of the dark colored marbles and the dark colored marbles in place of the light colored ones.

**Directions:** place the nine light colored marbles in the upper-left holes and the nine dark colored marbles in the lower-right holes, as in Figure A. You may jump over another marble of either color into an empty hole, either left and right or up and down (not diagonally) until all marbles are in the opposite side. You may make successive jumps if there are empty holes opposite each marble jumped. Do not remove the marbles from the board as you play.

### Key to Puzzle

*jumps correspond to space numbers in Figure B.*
